With a variety of attachments, The CHA-3 can be fitted to accommodate many styles of containers. With Heavy-Duty line shafting and variable speed drives the machine can be adjusted to fit any line speed. All materials contacting the cartons and product are FDA and USDA approved materials. Main drive is protected with an adjustable detented overload clutch that protects the system from damage in the event of a jam. Other items include high capacity carton magazine, elevated frame for sanitation, heavy-duty carton and product flight chains, efficient dynamic box runner technology and perimeter barrier guarding to mention just a few.
