With a variety of attachments, The CTC-30 can be fitted to accommodate many styles of containers and infeed configurations. With an All-Servo Drive Train, the machine can be adjusted to accommodate any line speed. All materials contacting the cases, cartons and product are FDA and USDA approved materials. The main servo drive protects the system from damage digitally, in the event of a jam. Other items include an optional high capacity tray magazine, elevated frame for sanitation, heavy-duty RS60 flight chains, efficient dynamic box runner technology, servo product loader, servo tray & carton erector along with perimeter barrier guarding to mention just a few.
